Mental Representations in Philosophy, Cognitive Science, and Neuroscience

Monday, 11 March 2024

1:30

Kennedy 112

Mental representations have long been treated as central in explaining the mind. In the 21st century however, not only is there no consensus on what mental representations *are*, there is a growing sense that they are not needed at all for our best understanding of ourselves. In this presentation I consider the history and future of representational theories.
